NAUTILUS EPOXY PRIMER WHITE component B SAFETY DATA SHEET - April 2023 - batch nº 145-BC

Revision n. 9 - Dated 04/19/2023

# Nautilus Epoxy Primer White component B

# SECTION 1. Identification of the substance/mixture and of the company/undertaking

# 1.1. Product identifier

Product name COMPONENT B NAUTILUS EPOXY PRIMER

Chemical name and synonym HARDENER FOR RESIN-BASED EPOXY PRIMERS/ENAMELS

UFI: PPT0-80UX-J004-FQU2

### 1.2. Relevant identified uses of the substance or mixture and uses advised against

Intended use MARINE/MARINE PAINTS

Identified Uses	Industrial	Professional	Consumer
Paint product for boating			
Paint product for industrial uses	j	• •	-
Prodotto verniciante per macchine agricole e movimento terra	¥	•	~
Prodotto verniciante per mobili	~	~	~

# 1.3. Details of the supplier of the safety data sheet

Name CECCHI GUSTAVO & C. srl
Full address Via M. Coppino 253
District and Country 55049 Viareggio (LU)
Italy

tel. +39 0584 383694

e-mail address of the competent person

responsible for the Safety Data Sheet info@cecchi.it

Supplier: CECCHI GUSTAVO & C. srl

# 1.4. Emergency telephone number

For urgent inquiries refer to - Supplier tel. +39 0584 383694

- CAV "Osp. Pediatrico Bambino Gesù" Dip. Emergenza e Accettazione DEA, Roma Piazza Sant`Onofrio, 4 - 00165 06

# NAUTILUS EPOXYPRIMER WHITE component B SAFETY DATA SHEET - April 2023 - batch no 145-BC

Revision n. 9 - Dated 04/19/2023

# **SECTION 2. Hazards identification**

Product not intended for uses provided for by Directive 2004/42/EC.

2.1. Classification of the substance or mixture

The product is classified as hazardous pursuant to the provisions set forth in (EC) Regulation 1272/2008 (CLP) (and subsequent amendments and supplements). The product thus requires a safety datasheet that complies with the provisions of (EU) Regulation 2020/878. Any additional information concerning the risks for health and/or the environment are given in sections 11 and 12 of this sheet.

Hazard classification and indication:

Flammable liquid, category 2	H225	Highly flammable liquid and vapour.
Specific target organ toxicity - repeated exposure, category 2	H373	May cause damage to organs through prolonged or repeated

exposure.

Skin corrosion, category 1B H314 Causes severe skin burns and eve damage.

Serious eye damage, category 1 H318 Causes serious eye damage.

Specific target organ toxicity - single exposure, category 3 H335 May cause respiratory irritation.

Skin sensitization, category 1 H317 May cause an allergic skin reaction.

Specific target organ toxicity - single exposure, category 3 H336 May cause drowsiness or dizziness.

#### 2.2. Label elements

Hazard labelling pursuant to EC Regulation 1272/2008 (CLP) and subsequent amendments and supplements.

#### Hazard pictograms:

Signal words: Danger

Hazard statements:

**H225** Highly flammable liquid and vapour.

H373 May cause damage to organs through prolonged or repeated exposure.

H314 Causes severe skin burns and eye damage.

H335May cause respiratory irritation.H317May cause an allergic skin reaction.H336May cause drowsiness or dizziness.

Precautionary statements:

P501 Dispose of contents/container in accordance with local/regional/national/international regulation

P102 Keep out of reach of children.

P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

P260 Do not breathe dust / fume / gas / mist / vapours / spray.

P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue

rinsing.

P301+P330+P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.

Contains: XYLENE (MIXTURE OF ISOMERS)

3-AMINOPROPYLTRI-ETHOXYSILANO

ISOBUTYL ALCOHOL

**BUTANOL** 

ADDUCT OF POLYAMINOAMIDE

Product not intended for uses provided for by Directive 2004/42/EC.

# NAUTILUS EPOXY PRIMER WHITE component B SAFETY DATA SHEET- April 2023 - batch n° 145-BC

Revision n. 9 - Dated 04/19/2023

# 2.3. Other hazards

On the basis of available data, the product does not contain any PBT or vPvB in percentage ≥ than 0,1%.

The product does not contain substances with endocrine disrupting properties in concentration  $\geq 0.1\%$ .

# **SECTION 3. Composition/information on ingredients**

# 3.2. Mixtures

# **SECTION 4. First aid measures**

#### 4.1. Description of first aid measures

EYES: Remove contact lenses, if present. Wash immediately with plenty of water for at least 30-60 minutes, opening the eyelids fully. Get medical advice/attention.

SKIN: Remove contaminated clothing. Rinse skin with a shower immediately. Get medical advice/attention.

INGESTION: Have the subject drink as much water as possible. Get medical advice/attention. Do not induce vomiting unless explicitly authorised by a doctor.

INHALATION: Get medical advice/attention immediately. Remove victim to fresh air, away from the accident scene. If the subject stops breathing, administer artificial respiration. Take suitable precautions for rescue workers.

### 4.2. Most important symptoms and effects, both acute and delayed

Specific information on symptoms and effects caused by the product are unknown.

#### 4.3. Indication of any immediate medical attention and special treatment needed

Information not available

# **SECTION 5. Firefighting measures**

# 5.1. Extinguishing media

# SUITABLE EXTINGUISHING EQUIPMENT

Extinguishing substances are: carbon dioxide, foam, chemical powder. For product loss or leakage that has not caught fire, water spray can be used to disperse flammable vapours and protect those trying to stem the leak.

UNSUITABLE EXTINGUISHING EQUIPMENT

Do not use jets of water. Water is not effective for putting out fires but can be used to cool containers exposed to flames to prevent explosions.

#### 5.2. Special hazards arising from the substance or mixture

## HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE

Excess pressure may form in containers exposed to fire at a risk of explosion. Do not breathe combustion products.

#### 5.3. Advice for firefighters

#### **GENERAL INFORMATION**

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always

Via M. Coppino 253 - 55049 Viareggio (LU) ITALY tel. +39 0584 383694 www.cecchi.it info@cecchi.it

NAUTILUS EPOXY PRIMER WHITE component B SAFETY DATA SHEET - April 2023 - batch nº 145-BC

Revision n. 9 - Dated 04/19/2023

wear full fire prevention gear. Collect extinguishing water to prevent it from draining into the sewer system. Dispose of contaminated water used for extinction and the remains of the fire according to applicable regulations.

SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

# **SECTION 6. Accidental release measures**

#### 6.1. Personal precautions, protective equipment and emergency procedures

Block the leakage if there is no hazard.

Wear suitable protective equipment (including personal protective equipment referred to under Section 8 of the safety data sheet) to prevent any contamination of skin, eyes and personal clothing. These indications apply for both processing staff and those involved in emergency procedures.

Send away individuals who are not suitably equipped. Use explosion-proof equipment. Eliminate all sources of ignition (cigarettes, flames, sparks, etc.) from the leakage site.

#### 6.2. Environmental precautions

The product must not penetrate into the sewer system or come into contact with surface water or ground water.

#### 6.3. Methods and material for containment and cleaning up

Collect the leaked product into a suitable container. Evaluate the compatibility of the container to be used, by checking section 10. Absorb the remainder with inert absorbent material.

Make sure the leakage site is well aired. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

#### 6.4. Reference to other sections

Any information on personal protection and disposal is given in sections 8 and 13.

# **SECTION 7. Handling and storage**

# 7.1. Precautions for safe handling

Keep away from heat, sparks and naked flames; do not smoke or use matches or lighters. Without adequate ventilation, vapours may accumulate at ground level and, if ignited, catch fire even at a distance, with the danger of backfire. Avoid bunching of electrostatic charges. When performing transfer operations involving large containers, connect to an earthing system and wear antistatic footwear. Vigorous stirring and flow through the tubes and equipment may cause the formation and accumulation of electrostatic charges. In order to avoid the risk of fires and explosions, never use compressed air when handling. Open containers with caution as they may be pressurised. Do not eat, drink or smoke during use. Avoid leakage of the product into the environment.

#### 7.2. Conditions for safe storage, including any incompatibilities

Store only in the original container. Store the containers sealed, in a well ventilated place, away from direct sunlight. Store in a cool and well ventilated place, keep far away from sources of heat, naked flames and sparks and other sources of ignition. Keep containers away from any incompatible materials, see section 10 for details.

Storage class TRGS 510 (Germany): 3

VND = hazard identified but no DNEL/PNEC available ; NEA = no exposure expected ; NPI = no hazard identified ; LOW = low hazard ; MED = medium hazard ; HIGH = high hazard.

# 8.2. Exposure controls

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration.

When choosing personal protective equipment, ask your chemical substance supplier for advice.

Personal protective equipment must be CE marked, showing that it complies with applicable standards.

Provide an emergency shower with face and eye wash station.

Exposure levels must be kept as low as possible to avoid significant build-up in the organism. Manage personal protective equipment so as to guarantee maximum protection (e.g. reduction in replacement times).

# HAND PROTECTION

Protect hands with category III work gloves.

The following should be considered when choosing work glove material (see standard EN 374): compatibility, degradation, failure time and permeability. The work gloves' resistance to chemical agents should be checked before use, as it can be unpredictable. The gloves' wear time depends on the duration and type of use.

# SKIN PROTECTION

Wear category II professional long-sleeved overalls and safety footwear (see Regulation 2016/425 and standard EN ISO 20344). Wash body with soap and water after removing protective clothing.

Via M. Coppino 253 - 55049 Viareggio (LU) ITALY

tel. +39 0584 383694 www.cecchi.it info@cecchi.it

# NAUTILUS EPOXYPRIMER WHITE component B SAFETY DATA SHEET - April 2023- batch nº 145-BC

Revision n. 9 - Dated 04/19/2023

Consider the appropriateness of providing antistatic clothing in the case of working environments in which there is a risk of explosion.

# **EYE PROTECTION**

**Properties** 

Wear airtight protective goggles (see standard EN 166).

#### RESPIRATORY PROTECTION

If the threshold value (e.g. TLV-TWA) is exceeded for the substance or one of the substances present in the product, wear a mask with a type AX filter, whose limit of use will be defined by the manufacturer (see standard EN 14387). In the presence of gases or vapours of various kinds and/or gases or vapours containing particulate (aerosol sprays, fumes, mists, etc.) combined filters are required.

Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. The protection provided by masks is in any case limited.

If the substance considered is odourless or its olfactory threshold is higher than the corresponding TLV-TWA and in the case of an emergency, wear open-circuit compressed air breathing apparatus (in compliance with standard EN 137) or external air-intake breathing apparatus (in compliance with standard EN 138). For a correct choice of respiratory protection device, see standard EN 529.

#### **ENVIRONMENTAL EXPOSURE CONTROLS**

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

Information

# **SECTION 9. Physical and chemical properties**

# 9.1. Information on basic physical and chemical properties

Appearance	liquid	mormation
Colour	straw yellow	
Odour	amine	
Melting point / freezing point	not available	
Initial boiling point	> 35 °C	
Flammability	not available	
Lower explosive limit	not available	
Upper explosive limit	not available	
Flash point	20 ≤ T < 23 °C	
Auto-ignition temperature	not available	
Decomposition temperature	not available	
рН	10,5 - 11	
Kinematic viscosity	>20,5 mm2/sec (40°C)	Method:v cinematica = v g/mm·s a 40°C / g/mm3
Dynamic viscosity	2' 30" ± 10"	Method:Coupe Din Ø 2 Temperature: 20 °C
Solubility	20% BY WT IN WATER	
Partition coefficient: n-octanol/water	not available

Information not available

9.2.2. Other safety characteristics

Total solids (250°C / 482°F) 31,90 % Method: Valore calcolato

VOC (Directive 2010/75/EÚ) 60,71 % - 542,22 g/litre VOC (volatile carbon) 47,73 % - 426,26 g/litre

# **SECTION 10. Stability and reactivity**

#### 10.1. Reactivity

There are no particular risks of reaction with other substances in normal conditions of use.

**METILETILCHETONE** 

Reacts with: light metals, strong oxidants. Attacks various types of plastic materials. Decomposes under the effect of heat.

3-AMINOPROPYLTRI-ETHOXYSILANO

Avoid exposure to: heat, moist air.

**BUTANOL** 

Attacks various types of plastic materials.

# 10.2. Chemical stability

The product is stable in normal conditions of use and storage.

# 10.3. Possibility of hazardous reactions

The vapours may also form explosive mixtures with the air.

XYLENE (MIXTURE OF ISOMERS)

Stable in normal conditions of use and storage. Reacts violently with: strong oxidants, strong acids, nitric acid, perchlorates. May form explosive mixtures with: air.

# METILETILCHETONE

May form peroxides with: air,light,strong oxidising agents.Risk of explosion on contact with: hydrogen peroxide,nitric acid,sulphuric acid.May react dangerously with: oxidising agents,trichloromethane,alkalis.Forms explosive mixtures with: air.

**BUTANOL** 

Reacts violently developing heat on contact with: aluminium,strong oxidising agents,strong reducing agents,hydrochloric acid.Forms explosive mixtures with: air.

# 10.4. Conditions to avoid

Avoid overheating. Avoid bunching of electrostatic charges. Avoid all sources of ignition.

Via M. Coppino 253 - 55049 Viareggio (LU) ITALY

tel. +39 0584 383694 www.cecchi.it info@cecchi.it

# NAUTILUS EPOXYPRIMER WHITE component B SAFETY DATA SHEET - April 2023- batch nº 145-BC

Revision n. 9 - Dated 04/19/2023

**METILETILCHETONE** 

Avoid exposure to: sources of heat.

3-AMINOPROPYLTRI-ETHOXYSILANO

Avoid exposure to: moist air.

**BUTANOL** 

Avoid exposure to: sources of heat,naked flames.

# 10.5. Incompatible materials

**METILETILCHETONE** 

Incompatible with: strong oxidants,inorganic acids,ammonia,copper,chloroform.

3-AMINOPROPYLTRI-ETHOXYSILANO

Avoid contact with: strong oxidising agents, acids, water.

# 10.6. Hazardous decomposition products

In the event of thermal decomposition or fire, gases and vapours that are potentially dangerous to health may be released.

3-AMINOPROPYLTRI-ETHOXYSILANO

In decomposition develops: carbon oxides, nitric oxide.

# **SECTION 11. Toxicological information**

In the absence of experimental data for the product itself, health hazards are evaluated according to the properties of the substances it contains, using the criteria specified in the applicable regulation for classification.

It is therefore necessary to take into account the concentration of the individual hazardous substances indicated in section 3, to evaluate the toxicological effects of exposure to the product.

# 11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008

Metabolism,	toxicokinetics,	mechanism	of action	and other	information

Information not available

# NAUTILUS EPOXYPRIMER WHITE component B SAFETY DATA SHEET - April 2023- batch nº 145-BC

Revision n. 9 - Dated 04/19/2023

WORKERS: inhalation; contact with the skin.

POPULATION: ingestion of contaminated food or water; inhalation of ambient air.

Delayed and immediate effects as well as chronic effects from short and long-term exposure

#### XYLENE (MIXTURE OF ISOMERS)

Toxic effect on the central nervous system (encephalopathy); irritating for the skin, conjunctiva, cornea and respiratory apparatus.

#### Interactive effects

# XYLENE (MIXTURE OF ISOMERS)

Intake of alcohol interferes with the metabolism of the substance, inhibiting it. Ethanol consumption (0.8 g/kg) before a 4-hour exposure to xylene vapours (145 and 280 ppm) causes a 50% reduction in the excretion of methyl hippuric acid, whereas the concentration of xylenes in the blood increases approx. 1.5-2 times. At the same time there is an increase in the secondary side effects of the ethanol. The metabolism of the xylenes is increased by phenobarbital and 3-methyl-colantrene type enzyme inducers. Aspirin and xylenes mutually inhibit their conjugation with the glycine, which results in a decrease in urinary excretion of methyl hippuric acid. Other industrial products can interfere with the metabolism of xylenes.

#### **ACUTE TOXICITY**

ATE (Inhalation - vapours) of the mixture: > 20 mg/l
ATE (Oral) of the mixture: >2000 mg/kg
ATE (Dermal) of the mixture: >2000 mg/kg

#### Note for users:

The information contained in the present sheet are based on our own knowledge on the date of the last version. Users must verify the suitability and thoroughness of provided information according to each specific use of the product.

This document must not be regarded as a guarantee on any specific product property.

The use of this product is not subject to our direct control; therefore, users must, under their own responsibility, comply with the current health and safety laws and regulations. The producer is relieved from any liability arising from improper uses.

Provide appointed staff with adequate training on how to use chemical products.

CALCULATION METHODS FOR CLASSIFICATION

Chemical and physical hazards: Product classification derives from criteria established by the CLP Regulation, Annex I, Part 2. The data for evaluation of chemical-physical properties are reported in section 9.

Health hazards: Product classification is based on calculation methods as per Annex I of CLP, Part 3, unless determined otherwise in Section 11.

Environmental hazards: Product classification is based on calculation methods as per Annex I of CLP, Part 4, unless determined otherwise in Section 12.

Changes to previous review:

The following sections were modified:

03 / 08 / 09 / 11 / 12 / 14 / 15 / 16.
